

CreatorHub

Empowering creators to control, monetize, and protect digital content through decentralized technology and intelligent automation.

The Creator Economy Is Broken

Content creators face a fragmented digital landscape and fundamental barriers to thriving.

Fragmented Platforms

Multiple platforms, inconsistent policies, and scattered audiences drain creator time and energy.

Unreliable Monetisation

Poor royalty tracking, opaque payments, and unpredictable revenue create financial vulnerability.

Limited IP Protection

Insecure licensing and weak protection lead to theft, unauthorized use, and loss of control.

Technical Barriers

Complex onboarding and blockchain knowledge exclude many from next-gen platforms and opportunities.

Our Solution: A Platform Built for Creators

CreatorHub is a **decentralised, AI-powered platform**. It eliminates pain points through elegant design and powerful technology, creating an ecosystem where creator empowerment becomes reality.

Seamless Experience

Intuitive onboarding with embedded wallets. No blockchain expertise required. Creators go from signup to monetisation in minutes.

Automated Intelligence

AI handles royalty distribution, payments, and IP registration. Creators focus on creating, not administration.

Secure Infrastructure

Blockchain protects content licensing and streaming. Ensures transparent, immutable records and intellectual property.

Our Vision

A global content ecosystem
where every creator
controls, licenses, and
monetises their work
transparently and securely.

We're building infrastructure that scales to **millions of users**. Its modular design allows rapid upgrades and feature deployment. CreatorHub offers simplicity for creators, flexibility for developers, and reliability for operators. This is the future of digital content ownership.

Demo Achievements: From Concept to Reality

Our functional demonstration proves the platform's capabilities and real-world utility.

AI-Driven Intelligence

Intelligent algorithms power live royalty calculations, automated licensing, verified identities, and on-chain payments.

Instant Content Upload

Automatic NFT minting, immediate licensing, and blockchain registration upon upload.

Integrated Dashboards

Real-time content analytics, audience insights, revenue tracking, and performance metrics via intuitive interfaces.

Embedded Wallet System

Seamless onboarding, secure video streaming, and operational insights, all end-to-end.

Powered by Algorand

CreatorHub's smart contracts are built native **blockchain**. We leverage its speed, low costs, and security. Our custom contracts are purpose-built for CreatorHub's unique requirements.

Automated Payouts

Secure, instant royalty splits. No intermediaries, no delays.

IP Registration

Fast, low-cost NFT licensing and IP registration, secured by immutable ledger.

Access Control

Instant content management and transparent dispute resolution. Unprecedented creator protection.

Delivers the scalability for millions of users, robust security for content assets, and compliance for global operations.

Technical Excellence: Built to Scale

Modular Architecture

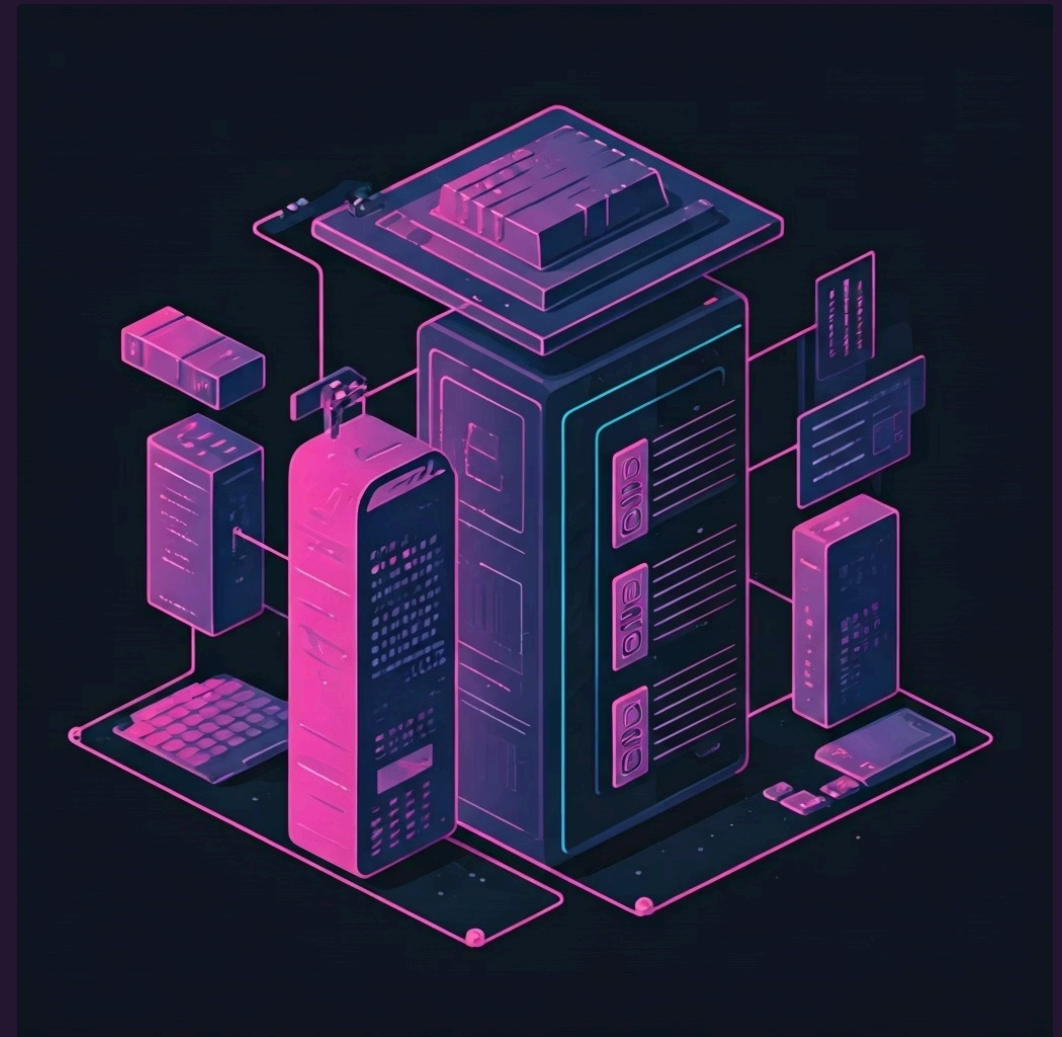

Independent, upgradeable components for rapid deployment and seamless integration.

Unified Development

Monorepo structure ensures consistent code quality and coordinated releases.

Multi-Stakeholder Design

Tailored for creators, developers, and operators.

1M+

Target User Scale

Scalable to millions of concurrent creators.

100%

Custom Smart Contracts

Blockchain logic custom-engineered for CreatorHub.

3

Core User Groups

Creators, developers, and operators.

Roadmap: Building the Future

Ambitious milestones to transform CreatorHub into the definitive infrastructure for digital content creators globally.

Multi-Chain Expansion

Expand to Ethereum, Polygon, and other major blockchains.
Enable cross-platform features for broader audience reach.

1

2

Global Streaming Infrastructure

Launch Livepeer streaming for decentralized, cost-effective global video distribution.

Advanced AI Monetisation

Integrate advanced AI for dynamic pricing, predictive analytics, and new creator revenue streams.

3

4

Education & Developer Tools

Expand educational resources, documentation, and developer onboarding. Foster a thriving ecosystem of third-party integrations.

Enhanced User Experience

Refine interfaces, enhance dashboards, and integrate feedback.
Make complex technology effortless.

5

Market Impact & Opportunity

The Creator Economy Explosion

The global creator economy is over \$100 billion, growing rapidly. Existing platforms take too much value, leaving creators fragmented and without control.

CreatorHub fixes this: providing infrastructure that returns power and value to creators.

With rising blockchain adoption and creator demand for better tools, CreatorHub is perfectly positioned. We're setting the standard for digital content sovereignty.

Our Competitive Advantage

- **Unified platform** eliminates fragmentation
- **Blockchain-native** IP protection & licensing
- **AI automation** reduces operational friction
- **Creator-first** design philosophy
- **Scalable infrastructure** for millions

Join the Revolution

CreatorHub: Empowering millions of creators with secure, scalable solutions.

CreatorHub is a movement for creator empowerment, fair compensation, and digital ownership. We're defining the future of content creation and monetization.

For Investors

Invest in a \$100B+ market with defensible technology and proven product-market fit.

For Partners

Collaborate across blockchain, streaming, AI, and creator tools.

For Creators

Your platform for control, transparency, and fair monetization.
